The protocol version is M10.0, which is similar to M13.0.10. MC2Card is the open source version of the Msr900 card reader software. It is a software . Category:Magnetic stripe Category:Smart cardAndroid Studio 2.1 includes a new Android Emulator that can handle OpenGL ES 3.0 and Vulkan. It can also render 1080p resolution on a quad-core emulator. It has its own default directory structure and for the first time, supports multi-user apps. What's New in Android Studio 2.1 Emulator Emulators have been upgraded with support for OpenGL ES 3.0 and Vulkan; which are among the features that offer high-performance graphics. It can also handle 1080p resolution on a quad-core emulator. It has its own default directory structure and for the first time, supports multi-user apps. The video below has an overview of the new Android Emulator. The emulator has been redesigned to make it more convenient and modern. There is support for USB host to device communication, full debugging and targeting specific devices for large applications. It also provides better support for virtual reality headsets. User Interface Android Studio 2.1 has a new UI that has a simplified working environment. It has self-explaining pop-ups, better navigation and support for touch screen devices. It provides better instrumentation for Linux and Mac OS X. The big change in Studio 2.1 will probably be the support for multi-user development. This allows users to share data and resources with multiple users in the same installation. It also gives developers the ability to schedule multiple tasks simultaneously. Another improvement is the support for the new format.material files, which is better for designing UI elements. Android Studio 2.1 is available for all devices that have Android Studio 1.5 and later. One of the biggest updates are Linux support. It comes in the form of native Android Studio builds for Ubuntu, 55cdc1ed1c
